TAPAN MANNA

Software Developer | Full-Stack Engineer

Kolkata, India | +91-9749697174 | mannatapan588@gmail.com | github.com/tapan2004 | linkedin.com/in/tapan-manna | Live Portfolio

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate (First Class Degree) and **Software Developer** with hands-on engineering experience building full-stack web applications, cross-platform software, and distributed backend services. Proficient in **Java, C#, ASP.NET Core, Node.js, and React**. Practical experience with Spring Boot microservices, REST APIs, gRPC, PostgreSQL, SQLite, Redis caching, Apache Kafka event streaming, and API security testing (OWASP Top 10).

PROFESSIONAL EXPERIENCE

Junior Software Development Engineer — *The Thirty Three* Sept 2026 – Present | Kolkata, India

- **Full-Stack & Backend:** Developing end-to-end applications and microservices using React, Node.js, C#, and ASP.NET Core; engineered RESTful APIs and gRPC inter-service communication.
- **Cross-Platform Software:** Designing and maintaining cross-platform client solutions and desktop application modules with focus on reliability and responsive user experiences.
- **Distributed Architecture & DBs:** Structuring schemas in PostgreSQL, SQLite, and Redis; streaming asynchronous event workflows using Apache Kafka; deploying with Docker on AWS.

Technologies: C#, ASP.NET Core, Node.js, React, Go, REST APIs, gRPC, PostgreSQL, SQLite, Redis, Docker, AWS, Kafka

Software Engineering Intern — *Sunyam Software* May 2026 – June 2026 | Kolkata, India

- Engineered full-stack features using **Java, Spring Boot, and Angular / Next.js**, creating secure and scalable RESTful endpoints.
- Optimized schemas with **PostgreSQL**; built stateless authentication & role-based authorization using **Spring Security & JWT**.

Technologies: Java, Spring Boot, Spring Security, Spring Data JPA, Angular, PostgreSQL, Git/GitHub

Experiential Learner Intern — *Remote Internship* April 2025 – July 2025 | Remote

- Performed **API security testing** using Postman & Burp Suite, identifying **10+ security vulnerabilities**; applied **OWASP Top 10** principles with Kali Linux verification.

TECHNICAL COMPETENCIES

Primary Languages:	Java, C#, SQL
Languages:	Java, C#, JavaScript, Go, Python, SQL
Backend & APIs:	Spring Boot, Spring Security, Spring Data JPA, ASP.NET Core, Node.js, RESTful APIs, gRPC, JWT, FastAPI
Frontend:	React, Angular, Next.js, HTML5, CSS3, Tailwind CSS
Databases & Caching:	PostgreSQL, MySQL, MongoDB, SQLite, Redis, Oracle, NoSQL
Distributed & DevOps:	Apache Kafka, Kafka Streams, gRPC, Microservices, AWS, Docker, Git/GitHub, CI/CD, Maven, Postman, Swagger
Security & Core CS:	OWASP Top 10, Burp Suite, Kali Linux, API Testing, OOP, Data Structures & Algorithms, DBMS, Operating Systems, Networks

FEATURED ENGINEERING PROJECTS

DocuSense: Enterprise RAG Platform with Pre-Retrieval Security | GitHub 2026

- Built secure multi-tenant document retrieval extracting RBAC claim boundaries from JWT signatures for pre-retrieval SQL filtering in pgvector; leveraged Java 21 Virtual Threads for concurrent chunking and Redis caching for <1ms query response times.

Stack: Java 21, Spring Boot 4, Spring Security, Spring AI, PostgreSQL (pgvector), Redis, React, Docker

PayGuard: Real-Time Payment Fraud Detection Pipeline | GitHub 2026

- Engineered an asynchronous transaction stream using Apache Kafka Streams for real-time risk scoring and sliding-window event aggregation; designed composite PostgreSQL indexes achieving sub-10ms ledger query latency under sustained write load.

Stack: Java 21, Spring Boot, Apache Kafka, Kafka Streams, PostgreSQL, Docker

DevSentinAI: Event-Driven AI Code Review Engine | GitHub 2026

- Built an automated PR review platform processing HMAC-validated GitHub webhooks asynchronously; created AST-aware code chunks stored in Redis Vector Store and used Spring AI to generate inline security and code quality review comments.

Stack: Java 21, Spring Boot, Spring AI, Redis Vector Store, GitHub Webhooks, Docker

Personal Finance Tracker API | GitHub Jan 2026 – Feb 2026

- Architected a Controller–Service–Repository backend with 15+ REST APIs, JWT authentication, automated Apache POI Excel report generation with Spring Scheduler, and automated budget alert emails via JavaMailSender.

Stack: Java, Spring Boot, Spring Security, JPA/Hibernate, MySQL, Apache POI, Cloudinary, JWT

EDUCATION

Sister Nivedita University — Kolkata, West Bengal, India Aug 2022 – June 2026

Bachelor of Technology (B.Tech) in Computer Science & Engineering **First Class Degree (Graduated)**

CERTIFICATIONS & KEY RECOGNITION

- **5-Star Java Badge** (HackerRank) — Validated advanced problem-solving proficiency in Java algorithms. March 2024
- **Junior Software Developer** (Amazon) — Professional backend engineering training covering enterprise software practices. January 2026
- **Data Structures & Backend with Java** (Board Infinity) — Spring Boot, JDBC, JPA, Hibernate, and REST APIs. June 2025
